Law Enforcement Training Support

Training-as-a-Service

OPCON's advanced line of explosive blast simulators offer immense training value for Law Enforcement through stress induced applications and real-world scenarios.

All simulators can blend seamlessly into any training environment, strengthening our first responders resolve in the event of any conflict encountered while in the line of duty.

Our subject matter experts work directly with your training staff or facility personnel to provide the most realistic explosive simulations while ensuring safety for all participants.

Who do we support?

- **Local Law Enforcement Organizations**
 - City Agencies
 - Sheriff's Departments
 - Constables
 - Department of Transportation
- **Federal Law Enforcement Organizations**
 - ATF
 - FBI
 - DHS
 - Secret Service
 - U.S. Border Patrol
- **Specialized Units**
 - SWAT
 - HRT
 - EOD

Stress Induced Training

Real life isn't perfect conditions, and training should be no different. By adding stress inducers to live-fire range training, officers can better adapt to the chaos of kinetic engagements reducing the likelihood of injury and death to both personnel and private citizens.

Safely maneuver around our self-contained, ballistic protected EXS-60-LEO explosive blast simulator during dynamic range scenarios.

- **Target Loss & Re-Acquisition**
- **React to “Fog of War”**
- **Accurately Engage Targets in chaotic environments**

Benefits of training with OPCON simulators:

- Safe Explosive Simulation
 - Classified as Non-Pyrotechnic, can be used on any outdoor range.
- Cost-Effective
- Increased Sets & Reps

Explosive Blast Simulation

Our simulators make it possible to safely train on, but not limited to, the following situations:

- Active Shooter/Bomb Threat
- Hostage Crisis & Negotiations
- Terror Threats
- UXO/CBRNE

Breaching and Forcible Entry

OPCON has developed the EXS-40-LEO for Close Quarter Combat allowing officers to safely replicate the effects of door breaching explosives without the high-costs associated with current live explosive training techniques.

OPCON simulators are single-man portable, enabling them to be used in most training environments. Easily relocate and reset any simulator to increase the trainees exposure.

| Simulator | Weight | Safe Distance |
|---------------|--------------|----------------|
| EXS-40 | 10lbs | 5 Feet |
| EXS-60 | 55lbs | 10 Feet |
| EXS-80 | 50lbs | 25 Feet |

**With standard ear and eye protection

In-house manufacturing also allows OPCON to adapt any product to specific training requirements. This includes, but not limited to:

- Permanent Installation
- Training Range Mounting Hardware
- Concealment Devices
- Vehicle Installations

EXPLOSIVE BREACH TRAINING KIT

The OPCON Explosive Breach Training Kit is designed for realistic, non-pyrotechnic entry training, making it the perfect solution for:

- ACTIVE SHOOTER / BOMB THREAT
- TERROR THREATS
- HOSTAGE CRISIS & NEGOTIATIONS
- AND UXO/CBRNE

SAFETY:

Realistic breach effects without the risks of live charges or flash bangs

AFFORDABILITY:

Costs a fraction of traditional breaching methods, enabling more reps per budget

PERFORMANCE:

Consistent, repeatable training that builds timing, communication, and decision-making under stress

KIT INCLUDES:

- **EXS-40 BLAST SIMULATOR**
Lightweight, single-man portable - used in close proximity with dismounted personnel for close quarter combat training.
- **MILITARY GRADE DEPLOYMENT CASE**
- **OXYGEN & PROPANE CYLINDERS**
- **REMOTE CONTROLLED FIRING SYSTEM**
- **ALL NECESSARY HARDWARE & ACCESSORIES FOR OPERATIONS**

THE CHAOS BOX

The OPCON Wireless Scenario Sound Kit, “The Chaos Box”, delivers **immersive, high-impact audio**.

Designed for active threat, dynamic entry, perimeter operations, and even traffic stops, it **injects realistic radio traffic, verbal commands, alarms, civilian and suspect audio, vehicle noise, and environmental stressors on demand**.

Portable and wireless, the Chaos Box also functions as a **PA system for academy instruction, safety briefings, graduations, competitions, and multi-agency training events, scaling easily from small team drills to full-scale scenarios**.

- **UP TO 1800 SOUND/SCENARIOS**
- **WIRELESS: 12+ HR BATTERY LIFE**
- **OUTDOOR RATED 12" SPEAKER W/ TRIPOD**
- **WIRELESS MIC INCLUDED**

SMOKE & FLASH BANG EFFECTS

The OPCON Smoke and Flash Band Effects system delivers controlled visual obscuration and momentary flash cues to enhance law-enforcement scenario realism. **Designed for dynamic entry, suspect apprehension, active threat, and low-visibility operations, it creates realistic smoke buildup, visual disruption, and attention-drawing flash effects without fire or fragmentation.**

Portable and remotely initiated, the system allows instructors to **introduce environmental stress and visual degradation on demand**, supporting safe, repeatable training for patrol, SWAT, and multi-agency exercises.
